

Independent, versioned backups so your business stays compliant, resilient, and in control.

## Purpose-built for the Autodesk Construction Cloud

Siinc is the missing synchronization layer between your business and cloud platforms like Autodesk's Construction Cloud, with products like BIM360 & BIM Collaborate.

It gives your business true control over their data across third-party platforms. While cloud-based tools like Autodesk drive productivity, they rarely offer the data safeguards companies assume they do.

Siinc closes this gap by mirroring project structures, preserving versions, and maintaining audit-ready logs so you can restore quickly, demonstrate continuity, and stay operational.

With Siinc, businesses gain the confidence to meet client expectations, comply with regulations, and recover from mistakes or disruptions without hesitation.

### Foresight

Prepartion for risk and platform change.

### Assurance

Seamless recovery & compliance you can trust.

### Resilience

Reliable, always-on protection in the face of failure.

### Compliance

Meet insurers and contractor guidelines to become compliant.

## Features & Benefits

Scheduled incremental backups:	Minimize data loss, continuous backups
Granular restore by file/folder/project:	Fast RTOs, minimal disruption
BYO storage (Public Cloud, Private Cloud or On-Prem):	Cost control & data sovereignty
Immutable logs & compliance reports:	Audit-ready, insurer-approved Full metadata preservation, ISO/Professional Indemnity/Cyber-insurance alignment
Security & control:	Encrypted storage, Secure workflows
Native platform integration:	Native Autodesk integration

## Business Resilience Scenarios

### Risk & Compliance

Pass cyber audits and meet insurance/tender requirements.

### Project Archive & Handover

Deliver clean, immutable project records simply and without fuss.

### Service Disruptions from Autodesk Construction Cloud

Outages are no longer a problem if access is required to meet deadlines.

### Business Continuity

Retain a copy of your own information if your contractor collapses or access is lost, you'll have your own complete copy.

## Subscription & Deployment Details

Licensing	Per GB/month
Storage Options	Azure, AWS, or BYO S3-compatible destination
Deployment Time	< 30 minutes setup with O Auth — no agents required
Support	Global 24x7 expert assistance

## Get Siinc

Take back control of your data. Try our instant quote calculator at [siinc.io/calculator](https://siinc.io/calculator) or email us at [get@siinc.io](mailto:get@siinc.io) to start protecting your data.
